

SUCCESSFUL PRESENCE OF NORDMECCANICA AT THE K FAIR

Nordmeccanica Group, present at the K Fair just ended in Duesseldorf, Germany, has seen, for the whole week of its duration, alternating in its stand a large number of customers and curious visitors.

During this edition, Nordmeccanica presented a successful project completed in great collaboration with key partners able to cover the Film-to-Film process loop.

The result of such partnership was a 96% PE High Barrier Recyclable Pouch, with no compromise to the physical properties.

Pouches were released as take away sample to Nordmeccanica stand visitors. The level of interest encountered by the initiative can be reported as very high by the huge numbers of visitors and samples distributed.

Nordmeccanica supported this project by its Demo center powered with Coating, Laminating and Metallizing machines, proving the capability of its Technology to handle easily new substrates leading to sustainability changes.

Nordmeccanica Technical Offices are focused on sustainability efforts and are available to follow their customer request to test and prove feasibility of possible alternative solutions.
