

KARAT®
KARAT
POWERflow

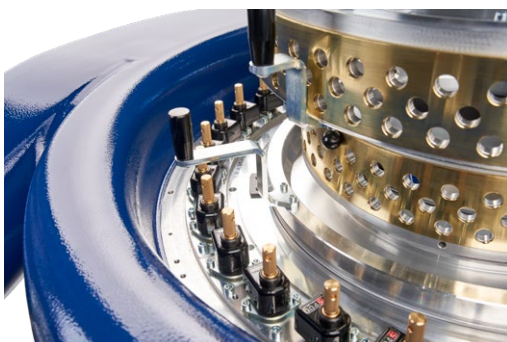

Highest output and best film quality

- Highest cooling rates for maximum output
- Tightest film tolerances producible
- No pressure drop and air heat up in pre-distribution
- Perfectly even air distribution for all working points
- Patented spiral chamber with spin feeder
- Extremely low energy consumption
- Up to 900 mm die size

Easy to operate

- Excellent bubble stability
- Automatic gauge control system VARIOcool
- Anti-monomer pollution lip design
- Easy installation

Options for increased productivity

- Dual lip and triple lip version
- Insulation against condensate build-up
- Manual flow adjustment VARIOcool-MA
- Monomer exhaust system
- Fully automated lip adjustment
